

Team ID	PNT2022TMID30319
Project Name	FERTILIZERS RECOMMENDATION SYSTEM FOR DISEASE PREDICTION

PROJECT FLOW:

- Download the dataset.
- Classify the dataset into train and test sets.
- Add the neural network layers.
- Load the trained images and fit the model.
- Test the model.
- Save the model and its dependencies.
- Build a Web application using a flask that integrates with the model built.

Solution Architecture
