

Project Design Phase-I Solution Architecture

Date	01 October 2022
Team ID	PNT2022TMID39548
Project Name	Fertilizers Recommendation System For Disease Prediction
Maximum Marks	4 marks

Solution Architecture:

Solution architecture is a complex process - with many sub -processes - that bridges the gap between business problems and technology solutions. Its goals are to:

- In this process many existing problems are there, that is a predicting, suggesting, finding the affected diseases.
- Structure of the architecture is solve the problems in easiest way and economical.
- Features of this process is early detection is a way to reduce huge economical loss.

Fertilizers Recommendation System For Disease Prediction
